VALUE ADDED COURSE

Completed "**FULL STACK PYTHON DEVELOPER in Besant Technologies**" Internship of 6 months from July 2022 to January 2023

- One of the most commonly used programming language today , python has quickly evolved to be the language of choice of most beginners
- It is used to build websites and software, automate tasks, and conduct data analysis. Python is a general-purpose language, meaning it can be used to create a variety of different programs and isn't specialized for any specific problems.

PROJECTS IN PYTHON

Project Name : Random password generator
Duration : 3 months
Role : Development
Technologies : Web based Application

We will use a Python script to generate a random password of 8 characters. Each time the program is run, a new password will be generated randomly. The passwords generated will be 8 characters long and will have to include the following characters in any order:2 uppercase letters from A to Z,2 lowercase letters from a to z,2 digits from 0 to 9,2 punctuation signs such as !, ? and symbols such as ,@,#,$,%.
